

Unlocking the Power of Genetics

– understanding the canine genome and how you can use this information to better your breeding program plus a canine structural workshop

The ABC's of Dog Breeding seminar is easy to understand and fun to learn. The session will be followed by a hands-on conformation workshop including how to determine shoulder angulation and placement. Demonstration dogs will be available but attendees will not be permitted to bring their dogs.

Claudia's involvement with the dog fancy began over 40 years ago as a junior handler. Since then she has owned and shown various breeds, but her passion for the last twenty years has been breeding Basset Hounds. The Orlandi's have bred over 100 champions under the Topsfield prefix. The Orlandi's Topsfield Kennel is located on 200 acres in Vermont. Topsfield Bassets hold numerous Breed and All-Breed records, ranging from Number One and Number Two All Breed Hound in 2001 and 2002 respectively, to winning multiple Pedigree, Dog of Year and Nature's Recipe Awards.

Claudia has served on the Basset Hound Club of America's Health and Research Committee, Judges' Education Committee and is presently chairman of Member Education. She judges Basset Hounds, Dachshunds and Junior Showmanship. Claudia's enthusiasm for breeding is matched only by her passion for teaching and working with other dog fanciers in the area of breeder's education. Her home study program, the ABC's of Dog Breeding, is based on the enthusiastic response to her educational seminars on breeding and her belief that anyone can and should understand the practical rules of animal breeding and canine genetics in their quest to breed better, healthier dogs.
